TERRE ROUGE® AND EASTON WINES

2011 Easton Barbera, Sierra Foothills - Monarch Mine Vineyard

This is our new Barbera grown on a North-facing slope at the Monarch Mine Vineyard located near Foresthill at 2,500 feet. It is made from two Barbera clones: #2 and a older Montevina selection. The style here is more racy and elegant than our Shenandoah Valley bottling; more Asti than Alba. Although a late ripener, this Barbera matured to perfection with low yields on November 2nd in 2011 vintage. It has beautiful black cherry fruit, precise varietal character, and a pleasant spiciness. It has a polished and refined characteristics. It drinks with layered complexity and persistence. It is finished in all French oak cooperage.

This bottling shows a reflection of place, and as with all of our wines it is well balanced, so it is suited for the table and it is fun to drink.

This is the one of several limited production "Grapehead Club" wines that will mostly be sold to our club members first, and then only to the general public if some wine is still available. Look for our special club Pinot Noir, Cabernet Franc, Barbera, Syrah, Zinfandel, and Grenache Blanc in the future.

14.5 % alcohol by volume; 3.45pH; 6.8 gm./liter total acidity

Release Date: February 2015
